Location: Australia, NSW, Newcastle

Professional Summary

I'm a full-stack software engineer based in Newcastle NSW, Australia, with a passion for building innovative technology solutions. My expertise spans frontend and backend development, with a particular focus on creating practical, business-focused solutions. I continually expand my knowledge through self-directed learning to stay current with emerging web technologies. I thrive in collaborative environments and have extensive experience working with cross-functional teams. Whether it's during project design, technical architecture discussions, or implementation phases, I communicate effectively across various channels including in-person, video, and text-based platforms.

Technical Skills

Frontend Development

- Modern React (Next.js, Gatsby, React Query)
- Angular & TypeScript
- UI/UX Design Principles
- Testing (Jest, React Testing Library)
- State Management (Redux, Context API)

Backend Development

- Node.js Ecosystem (Express, NestJS)
- C# (.NET Core, ASP.NET)
- Go (Basic service development)
- Database Design & Management
- PostgreSQL, MS SQL
 - Database optimization
- Working knowledge of Python/Django
- API Design & Development

Infrastructure & DevOps

- Cloud Platforms & Architecture
 - AWS (ECS, Lambda, Connect)
 - GCP
 - Vercel
- Infrastructure as Code
 - Terraform
 - AWS CloudFormation
 - Ansible
- Container Orchestration
 - Docker & Docker Compose
 - Kubernetes (Helm, ArgoCD)
- CI/CD Pipelines

- GitHub Actions
- BuildKite
- GitLab CI

Personal Technical Exploration

I'm passionate about exploring new technologies and maintaining a personal homelab environment where I experiment with:

Elixir programming language and the BEAM ecosystem NixOS and Nix for reproducible system configurations Self-hosted infrastructure and home automation System administration and network management in homelab environments

These personal projects help me stay current with emerging technologies and understand systems from the ground up.

Professional Experience

Senior Software Engineer | nib Health Funds - Data & AI Team

March 2022 - Present

- Led team through the redesign and implementation of AWS Connect integration, delivering a complex solution spanning frontend, backend, and infrastructure
- Mentored junior team members, fostering their technical growth and development
- Improved team organizational practices and development workflows
- Collaborated with support engineers to manage and resolve business-critical issues
- Maintained clear communication between technical teams and business stakeholders, ensuring project visibility and alignment

Senior Engineer | BodyMindLife Online

August 2021 - March 2022

- Led a development team building and maintaining the core online platform
- Orchestrated team workflows and daily operations
- Designed system architecture and guided technical direction
- Spearheaded development of a new microservices-based platform on GCP

Web Services Engineer | SwitchdIn

January 2021 - August 2021

- Built and maintained a cross-platform mobile app using Angular and Ionic
- Developed and improved internal APIs using Python and Django
- Contributed to planning sessions and technical documentation
- Mentored junior developers through code reviews and pair programming

Senior Software Developer | Mudbath

March 2020 - March 2021

- Designed and implemented robust software systems based on client requirements
- Created and reviewed technical documentation
- Mentored junior team members
- Collaborated with cross-functional teams to deliver client solutions

Senior Software Developer | nib Health Funds

June 2019 - March 2020

- Led delivery teams and mentored junior developers
- Developed solutions for internal and external customers
- Designed technical solutions to address business needs
- Collaborated across business units to ensure cohesive solution design

Software Developer | nib Health Funds

Jan 2017 - June 2019

- Developed and maintained customer-facing applications
- Designed technical solutions aligned with business requirements
- Collaborated with stakeholders to ensure successful project outcomes

Software Developer | SwitchdIn

2016 - 2017

- Developed frontend web applications using Angular.js
- Managed PostgreSQL/Django backend infrastructure on AWS
- Enhanced platform scalability and user experience

Software Developer | Forsythes Information Technology

2015 - 2016

- Developed web solutions using Microsoft technologies
- Created and maintained documentation
- Managed server infrastructure and CI/CD pipelines

Education

Bachelor of Information Technology

Newcastle University (2011–2014)

Major: Software Development and Applications

Diploma of Surveying

TAFE Hunter Institute (2009–2010)

High School Certificate

Hunter School of Performing Arts
